

We are hiring! **Jr. SQL Developer**

What You'll Do – The Role

- Create SQL views, queries and stored procedures to enhance application functionality and resolve issues.
- Work with other members of the team to meet with business stakeholders and gather requirements for new feature or report/dashboard development.
- Prepare data for reporting purposes and create impactful SSRS reports.
- Assist with technical troubleshooting for SQL-connect applications. There is some limited amount of direct end-user support involved in the role.
- Design and implement Power BI dashboards.
- Assist the team with a variety of software development projects, under the direction of the Senior Dynamics Developer.

What You Need

- University degree in Computer Science or related field, relevant industry certifications, or equivalent work experience.
- A high level of proficiency with SQL scripting is required for this role (1-2 years' experience preferred).
- Fundamental understanding of other programming languages considered an asset (C#, .NET, HTML, JavaScript).
- Ability to design and deploy professional SSRS reports to business stakeholders.
- Strong understanding of Microsoft Excel.
- Previous experience with Power BI, Dynamics GP and/or Dynamics CRM is considered an asset, but not essential.
- Generalist mindset to work on a wide array of software-related tasks and projects.
- Excellent verbal and written communication skills.
- Superior customer service skills.
- In the case of a power outage or declared State of Emergency by any level of Government in Ontario, be available for work.
