

PRESS RELEASE- Generac Is Taking Over!

Total Power is pleased to announce that its primary business partner Generac Power Systems has acquired a subsidiary of the ABB Group, Baldor Generators. On October 8th, Generac announced the signing of a purchase agreement with Baldor Electric Company to acquire all the assets of Baldor's generator products division, "Baldor Generators."

Acquiring Baldor Generators allows Generac to have immediate access to a larger industrial product line including single diesel sets up to 2.5MW. This acquisition is a key part of Generac's strategy to better support the growing needs of the global power generation markets.

Total Power's primary product lines include both Generac and Baldor generators. "The combination of Generac and Baldor will give us a full product line under one brand with one of the global leaders in power generation. This is a very good day for Total Power and our customers" says Andy Rudderham VP of Total Power.

Following the transaction, the employees of Baldor Generators and their Oshkosh, WI facility will become part of Generac's manufacturing footprint. The Baldor name is not included in the agreement; however Generac will continue to support Baldor Generator's existing customers and distribution network going forward. This acquisition is expected to close towards the end of 2013 pending the closing conditions.

Total Power is looking forward to proudly represent the expanded Generac product line and introducing the new benefits to our customers! For more information on Total Power's products and services please visit our website, www.totalpower.ca, or call us toll free at 888-870-9152.
